## W. Germany: Reports say Mengele still alive

BONN — The Nazi "Angel of Death" Josef Mengele did not die six years ago in Brazil but is alive in Paraguay, according to West German newspaper reports Sunday. Despite the reports about Mengele's death, the mass-circulation *Bild am Sonntag* newspaper said it was told by an Israeli intelligence agent that Mengele is seriously ill with cancer and living in Paraguay. The *Welt am Sonntag* newspaper quoted Israeli authorities as saying simply that Mengele is alive. Meanwhile, in Sao Paulo, Brazil, 11 American, West German and Israeli specialists prepared to examine the bones thought to be those of Mengele.
